

SO SOON

Soon was late and late was soon

in time past,

So soon is too late

in time present,

Never soon or late

in time future,

Soon and late together

in time past

Persists in time future.

Soon was far and late was near

in time past

So soon is too far

in time present.

Never soon and near nor late and far

in time future,

Soon and late, far and near

in time past

Persists in time future.

You and I, soon and late, far and near

in time past

So soon is too late and far

in time present

I, have, now, you always far away,

in time future

You and I soon and late entwined

in the past

Persists in time future,
