

57. Relation between heights and weights of Bengali women.

G. C. NANDI, J. DHAR, S. SEN, *and* P. C. MAHALANOBIS,
Calcutta.

Records of height, weight, parity, caste, civil status, and economic class were obtained for about 2,700 women attending the Calcutta Exhibition in 1933. The relation between height and weight for different age groups has been investigated in detail by the method of skew correlation analysis.
